AI workshops for teams

Understand, practise and decide using concrete work situations.

01 / Business teams

Objective: use AI on professional tasks while checking the results.

Proposed programme

- Capabilities, limitations and confidentiality.
- Write a clear, usable request.
- Practise using non-sensitive examples and check the outputs.

Proposed materials

Session materials, reusable examples and a review checklist.

02 / Leaders & managers

Objective: identify use cases to explore and prepare a first decision.

Proposed programme

- Existing products, automation and AI development.
- Expected value, data, risks and feasibility.
- Prioritisation and criteria for a first experiment.

Proposed materials

Prioritisation matrix, scoping questions and a next-step worksheet.

Prepare your request

Describe the audience, group size, level, objective and any scheduling or format constraints.

Duration, final programme, arrangements, materials and price are defined in a proposal before the session.
